## Meet Spottie WiFi, the CryptoPunk Rapper Who Made \$192,000 in 60 Seconds

### Bio

Spottie WiFi is the best (only) CryptoPunk rapper alive. He disrupted the music industry in August 2021 by selling 2000 NFT albums and generating \$192K in revenue in under 60 seconds as an independent artist. Since then, the album has gone on to generate over 200 ETH in secondary sales and is one of the most successful and innovative music NFTs in history. Spottie received the 2021 NFT.NYC award for Best Use of NFTs in the Music Industry, was named to NFT Now's NFT 100 list, and has helped onboard countless musicians and creators to Web3.

### New Album

In April 2023, Spottie released his sophomore album "The King's Alpha" which again redefined what is possible for independent artists distributing their music via both traditional channels and blockchain. The album features appearances and collabs from some of the legendary artists Spottie has helped onboard into Web3 including Snoop Dogg, Bun B, Jim Jones, Timbaland and more.

### Live Show

Spottie has opened for major artists including Snoop Dogg, Eminem, Lil Wayne, Bun B, Soulja Boy, Marshmello, Waka Flocka, Quavo, Flosstradamus, Paris Hilton and others. He has performed at major IRL and metaverse events including Decentraland's Metaverse Music Fest, ApeFest, NFT.NYC, NFT LA, NFT Week Miami, NFT London and many more.
